IT INTERVIEW PREPARATION CHECKLIST

A practical, confidence-building guide for freshers

Prepare confidently for IT Support interviews by reviewing essential technical skills, practising common questions, structuring answers with the STAR method, and strengthening your communication and problem-solving skills. Verify technical information and communicate professionally.

01 BEFORE THE INTERVIEW

Build a strong foundation before you enter the room.

- Research the company and understand the job role.
- Review basic networking, Windows and troubleshooting concepts.
- Practise common technical interview questions.
- Prepare a clear, concise self-introduction.
- Review your projects and the technical skills listed on your resume.

02 DURING THE INTERVIEW

Show how you think, communicate and solve problems.

- Listen carefully and make sure you understand each question.
- Explain your troubleshooting steps clearly and in order.
- Use the STAR method for behavioural questions.
- Give practical examples wherever possible.
- Communicate confidently, calmly and professionally.

03 AFTER THE INTERVIEW

Turn every interview into a learning opportunity.

- Review your answers and identify what went well or poorly.
- Note the topics and skills that need improvement.
- Practise weaker topics before your next interview.
- Thank the interviewer professionally.

QUICK INTERVIEW TIPS

Be honest about what you know • Never guess when unsure • Explain your approach step by step
Focus on user satisfaction and problem-solving • Keep learning and improving

CONFIDENCE COMES FROM PREPARATION AND PRACTICE.
